Diagnosis / History

Medical Diagnosis: Cardiac Bypass, Multivessel Disease — Onset 01/14/2026

PT Diagnosis: Muscle Weakness — Exacerbation 12/14/2025

Relevant Medical History:
Have an 80 year old male patient who was referred to PT post cardiac surgery. Patient was hospitalized for 6 days pMH: HTn, hyperlipidemia, OA, right knee replacement, macular degeneration, enlargement prostate,

Prior Level of Functioning:
Patient was independent with all mobility prior to onset.

Patient's Goals:
To get stronger and more mobile

Precautions: Cardiac precautions, high risk for falls

Homebound?
☐ No
✔ Yes

For a patient to be eligible to receive covered home health services under both Part A and Part B, the law requires that a physician certify in all cases that the patient is confined to his/her home. For purposes of the statute, an individual shall be considered "confined to the home" (homebound) if the following two criteria are met:

Criteria One:

✔ Patient is confined because of illness, needs the aid of supportive devices such as crutches, canes, wheelchairs, and walkers; the use of special transportation; or the assistance of another person in order to leave their place of residence.

AND/OR
✔ Patient has a condition such that leaving his or her home is medically contraindicated.

Specify:
fatigues very easily and loss of balance

If the patient meets one of the criterion one conditions, then the patient must ALSO meet two additional requirements defined in criterion two below.

Criteria Two:

✔ Patient has a normal inability to leave home.

AND
✔ Leaving home requires a considerable and taxing effort for the patient.

Specify:
forward posture and high risk for falls

Needs

Clinical Statement of Assessment Findings and Recommendations

Patient is a good candidate for PT to focus on strength and balance to prevent falls and injuries. Patient instructed to use spc for both indoors and outdoors to prevent falls and injuries

Treatment Goals

		Time Frame
1:	LTG: Patient to be safe and indep with HEp, fall prevention, and energy conservation in prep for PT DC	03/21/2026
2:	STG: Patient to be safe and indep with all functional transfers	02/25/2026
3:	LTG: Patient to improve strength by 1 grade to LE to enhance wt bearing activities	03/21/2026
4:	LTG: Patient to walk x 300+ ft on all surfaces with improved balance, posture, and gait parameters	03/21/2026
