Physical Assessment

Manual Muscle Test (MMT) Muscle Strength

Grade	Description
5	Normal functional strength - against gravity - full resistance
4	Good strength - against gravity with some resistance
3	Fair strength - against gravity - no resistance - safety compromise
2	Poor strength - unable to move against gravity.
1	Trace strength - slight muscle contraction - no motion
0	Zero - no active muscle contraction

Functional Range of Motion (ROM) Scale

Grade	Description
5	100% active functional motion
4	75% active functional motion
3	50% active functional motion
2	25% active functional motion
1	Less than 25%

ASSESSMENT SUMMARY FOR CONTINUED SKILLED HOME HEALTH PHYSICAL THERAPY SERVICES

Patient is demonstrating steady progress toward PT goals with improved strength, balance, and functional mobility since last evaluation. However, he continues to present with poor endurance and gait impairments, requiring use of a front-wheeled walker for safe ambulation. These deficits place the patient at continued risk for falls and limit his ability to safely perform functional mobility within the home without skilled intervention.

Patient continues to benefit from skilled home health physical therapy to address remaining deficits in endurance, gait quality, and safety with assistive device use in order to maximize independence and reduce fall risk.

Goals and Treatment Plans

Interventions

Physical Therapy

- Evaluation and Treatment
- Establish Home Exercise Program and Activity Program
- Home safety evaluation and fall prevention/teach fall risk reduction strategies
- Therapeutic Exercises: Balance, coordination, and/or agility training
- Therapeutic Exercises: Strength training
- Gait Training: Even and uneven surfaces and/or natural terrain
- Transfer Training : Supine <>Sit, Sit <> Stand, Bed <> Chair, On/Off toilet or commode, in/Out shower or tub , Floor , car
- Bed Mobility: Scoot/roll/bridge

Long Term Goals

Description

Mobility

- LTG-Pt will demonstrate an increase in strength via the TUG with an improved score of 13 seconds to decrease risk for falls.

Previous Status:

CurrentStatus:

Base Line: **Mastery Level:** **Time Frame:**

Mobility/Gait

- LTG-Patient will ambulate on level surface a continuous distance of 300ft using 2WW with SBA to improve safety at home and enhance ability to walk to bathroom from living room or bedroom.

Previous Status:

CurrentStatus:

Base Line: **Mastery Level:** **Time Frame:**

Strength

- LTG-Patients will be independent with BUE/BLE home exercise programs in order to maintain gains made in-home therapy.

Previous Status:

CurrentStatus:

Base Line: **Mastery Level:** **Time Frame:**
