Physical Assessment

Manual Muscle Test (MMT) Muscle Strength

Grade	Description
5	Normal functional strength - against gravity - full resistance
4	Good strength - against gravity with some resistance
3	Fair strength - against gravity - no resistance - safety compromise
2	Poor strength - unable to move against gravity.
1	Trace strength - slight muscle contraction - no motion
0	Zero - no active muscle contraction

Functional Range of Motion (ROM) Scale

Grade	Description
5	100% active functional motion
4	75% active functional motion
3	50% active functional motion
2	25% active functional motion
1	Less than 25%

Upper Extremity Prior ☐ Not Applicable

PT Re-Eval with Supervisory

Order#: *PT-26359* **Order Date:** *02/23/2026* **Order Time:** *09:41 AM*

Client: Hilbrich, Arlen **MR#:** 9482 **DOB:** 10/30/1951 **Date:** 02/23/2026 **Time:** 08:45 09:41 **Total Hours:** 1

Location: Victoria **Clinician:** Bondoc, Roel - PT **Episode:** 1 - 02/05/2026 -- 04/05/2026 **Miles:** 10

PT Recertification: To continue skilled home health Physical Therapy services due to continuing functional progress and in order to maximize functional skills

Improved overall muscle strength with MMT Gr from 3/5 to 4/5
Improved gait capacity from 100 ft to more than 300 ft without an AD
Improved dynamic standing balance skills without LOB with Supervision

Goals and Treatment Plans

Interventions

Physical Therapy

- Evaluation and Treatment
- Establish Home Exercise Program and Activity Program
- Home safety evaluation and fall prevention/teach fall risk reduction strategies
- Therapeutic Exercises: Balance, coordination, and/or agility training
- Therapeutic Exercises: Neuromotor training/neuromuscular re-education
- Therapeutic Exercises: Strength training
- Gait Training: Asst device with no AD

Long Term Goals

Description

Mobility/Gait

- LTG-Patient will demonstrate improved activity tolerance as evidenced by the increased ability to ambulate for more than 300 ft without an AD and with Supervision in order to maximize gait capacity at end of episode.

Previous Status:

CurrentStatus:

Base Line: **Mastery Level:** **Time Frame:**

Strength

- LTG-Patient will demonstrate improved strength of BLE as evidenced by manual muscle test increase from 3+/5 to 4+/5 in order to maximize stability during standing activities at end of episode.

Previous Status:

CurrentStatus:

Base Line: **Mastery Level:** **Time Frame:**

Short Term Goals

Description

Balance

- STG-The patient will demonstrate improved standing balance skills and will decrease in fall risk as evidenced by the ability to perfo leg stand for 10 seconds with SBA within 4 weeks.
