Is Patient Homebound? ☑ Yes ☐ No ☐ Considerable and taxing effort to leave home

☑ Need assistance for all activities
☑ Dependent upon adaptive device(s)
☐ Confusion/alerted mental status
☐ Chairbound
☑ Other(Specify): PWB RLE
☑ Severe SOB, SOB upon exertion
☑ Require assistance to ambulate
☐ Bedbound
☑ Residual weakness
☑ Medical restrictions
☑ Unable to safely leave home unassisted

**Comments:**

## Vital Signs/Current Status

**Temperature:** 97 F **Pulse:** 90 **Blood pressure:** 132/94 **Respiration:** 16
**Weight:** **O2 saturation:** 97 %
**Posture:** normal
**Endurance:** reduced
**Restrictions in activity:** PWB of RLE
**Skin:** R ankle surgical incisions have healed - no s/s of infection
**Edema:** right ankle - non pitting
**Vision:** normal
**Sensation:** intact to light touch of R LE
**Communication:** normal
**Hearing:** normal

## Pain (0 - 10)

**Intensity:** 3 **Location:** right foot
**Aggravating Factors:** transfers, bed mobility
**Relieving Factors:** rest
**Best pain gets:** 1 **Worst pain gets:** 5 **Acceptable level of pain:** 0 **Current level of pain:** 3
**Impact on Therapy POC?** right foot pain impacts functional mobility and gait, and ADL
**Comments:** n/a

## Muscle Strength/Function ROM Eval

**MANUAL MUSCLE TEST (MMT) MUSCLE STRENGTH**

| GRADE | DESCRIPTION |
|---|---|
| 5 | Normal functional strength - against gravity - full resistance |
| 4 | Good strength - against gravity with some resistance |
| 3 | Fair strength - against gravity - no resistance - safety compromise |
| 2 | Poor strength - unable to move against gravity |
| 1 | Trace strength - slight muscle contraction - no motion |
| 0 | Zero - no active muscle contraction |

**FUNCTIONAL RANGE OF MOTION (ROM) SCALE**

| GRADE | DESCRIPTION |
|---|---|
| 5 | 100% active functional motion |
| 4 | 75% active functional motion |
| 3 | 50% active functional motion |
| 2 | 25% active functional motion |

## Assessment Summary

The patient presents for her home health re-evaluation following ORIF of her right ankle (sx - 12/23/25). She had a follow-up on 02/09/26 and was cleared to begin gradual weight bearing. She continues to use her ankle/foot immobilizer to ambulate short distances with 25% weight bearing. We are gradually progressing her WB every week, as she tolerates it. Her limited right ankle ROM and strength impact her ability to stand up, walk, and complete her ADL. Today, her right ankle ROM was measured as follows: DF/PF/Inv/Ev - (R/L) -10/17, 40/45, 12/21, 9/25 degrees. Her right ankle strength is grossly 3/5. She has pain that ranges from 1/10 (at rest) to 5/10 with gait and ADL. She is using a 2w RW to ambulate short distances in the home and occasionally uses her wheelchair when having to leave her home for long distances. Her gait impairments include reduced stance time on the RLE, uneven steps, decreased right heel strike, slow and staggering 180° turns, increased weight bearing on the walker, and reduced endurance. Today, she used her 2w RW and completed her TUG in 25 seconds. Scores greater than 12 seconds indicate a fall risk. Her Tinetti/POMA score of 15/28 indicates a high fall risk. Following her evaluation, she was educated on several exercises: (1) ankle stretch on step, (2) gastroc-soleus stretch on step, (3) heel-toe raises in standing, and (4) lateral walking. A copy of these exercises was emailed to her to increase her indep and compliance. Mrs. Morris continues to be homebound and presents as a fall risk. She would benefit from skilled home health therapy to improve her right ankle ROM/strength, standing balance, transfer safety, gait safety, endurance, and indep with her ADL. Home health therapy is being requested for one month with a focus on addressing the impairment list in the evaluation and prepare her for outpatient rehabilitation.

## Goals / Interventions

**Physical Therapy**

### Interventions

Establish Home Exercise Program and Activity Program

Home safety evaluation and fall prevention/teach fall risk reduction strategies

Therapeutic Exercises: AROM, strengthening, balance

Gait Training: even and uneven surfaces to include stairs, using RW and following WB restrictions

Transfer Training : wheelchair to multiple surfaces in the home (toilet, dining chair, car, shower chair)

Manual wheelchair mobility training

**Functional Mobility**

### Goals

STG-The patient will improve functional mobility as evidenced by the increased ability to safely maneuver the wheelchair throughout home independently within 4 weeks.

**HEP**

### Goals

STG-Patient and/or caregiver will complete Home Exercise Program indep within 4 weeks.

**Mobility/Gait**

### Goals

LTG-Patient will demonstrate improved mobility as evidenced by the increased ability to ambulate with cane for 250 ft with supervision in order to attend outpatient PT within 4 weeks or at end of episode.

STG-Patient will be able to climb 16 stairs with her walker and min A in order to safely get to the 2nd floor of her home and take her showers within 4 weeks.

STG-Patient will demonstrate improved mobility as evidenced by the increased ability to ambulate with a 2 w RW and WB restriction for 100 ft with

# PT Re-Evaluation

**Order#:** *PT-26440* **Order Date:** *02/24/2026* **Order Time:** *09:47 A*

**Client:** Morris, Sharon **MR#:** 8427 **DOB:** 04/24/1956 **Date:** 02/24/2026 **Time:** 08:57 - 09:47 **Total Hours:** 0.75Hr

**Location:** Buda **Clinician:** Fernandez, Dario - PT **Episode:** 2 -- 01/30/2026 - 03/30/2026 **Miles:**

SBA to safely walk in her home within 4 weeks.

**ROM**

**Goals**

STG-Patient will improve right ankle dorsiflexion to 0 degrees to enable the patient to improve her heel strike during gait within 4 weeks.

**Transfer Training**

**Goals**

STG-The patient will improve shower transfer from wheelchair to shower using a walker to be able to safely take her showers within 4 weeks.

STG-The patient will improve toilet transfer from max A to min A using a walker and a wheelchair to be able to safely transfer onto the toilet within 4 weeks.

STG-The patient will improve car transfer from max A to Min A using a walker in order to transfer into her car and get to her medical appointments within 4 weeks.

**Summary**

**CARE COORDINATION:** ☑ Physician ☑ SN ☐ PT ☐ OT ☐ ST ☐ MSW ☐ Aide
☑ **Others(Specify):** scheduler

**REHABILITATION POTENTIAL:** ☐ Guarded ☐ Poor ☑ Fair ☐ Good ☐ Excellent

☐ **Evaluation Only, No Further Treatment Indicated**

**DISCHARGE PLANS:**

☑ Client to achieve optimal function
☑ Client to complete rehabilitation as outpatient
☐ Client will achieve independence and be followed by own MD
☐ Others:

**Discussed with:**
☑ Patient ☑ Care manager ☑ Physician ☐ Other:

☑ Patient ☑ Caregiver involved/aware of development of POC/Goals: Yes

**Treatment provided in this Visit:**PT evaluation and treatment - educated patient on ankle AROM exercise - dorsiflexion stretch on step, gastroc-soleus stretch on step, lateral walking x2 minutes, ankle contract and relax.

**Visit Plan Frequency:**

| Service Type | Job Code(Job Description) | Visits per week | | | | | | | | | | Total Visits | 485 Description |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | wk1 | wk2 | wk3 | wk4 | wk5 | wk6 | wk7 | wk8 | wk9 | wk10 | | |
| PT | | 0 | 1 | 1 | 1 | 1 | 2 | 1 | 1 | 1 | 0 | 9 | PT Frequency: 1W4, 2W1, 1W3 Starting Week of 02/01/2026, |

**Comments:** Effective 03/01/26 - 2w1, 1w3
