Follow up / post hospital visit

SUBJECTIVE

History Of Present Illness

2/27/26 Follow up / post hospital visit

Follow up / post hospital visit completed on Ms. Zulema Rivera. Daughter Nadia and provider present for visit.

The patient is an elderly female with a history of a urinary tract infection (UTI), pneumonia, and a wound requiring care. Her daughter is present and provides additional medical history and context.

1. Urinary Tract Infection (UTI)
The patient was treated in the hospital for a UTI resistant to standard antibiotics. She was discharged yesterday, and her daughter reported that the UTI was discovered late, leading to the current treatment plan. She has a history of allergy to cephalosporins and penicillin, complicating antibiotic selection. Blood was noted in the urine two days ago, and the patient has been lethargic. Per UTI report ertapenem is the drug of choice given multiple allergies and multiple drug resistant medications. Hospital MD suggested ertapenem 500mg IM daily x 7 days there is no 500mg IM available changed to 1g IM daily x 4 days. Daughter informed of potential adverse reactions / side effects daughter/patient agreed to continue with above therapy.

2. Pneumonia
The patient was hospitalized for pneumonia, which was part of the reason for her recent admission to Main Methodist. The pneumonia was treated during her hospital stay.

3. Wound Care
The patient has a sacral bed ulcer and a wound on her arm. The arm wound resulted from thin skin and an abrasion from an IV bracelet. The wound on her arm stopped bleeding last Wednesday after bleeding for about four days.

Skilled nursing to reconstitute ertapenem prior to injection add 3.2 mL of 1% lidocaine to the 1 g vial; shake the vial thoroughly until the powder is fully dissolved.Skilled nursing to administer ertapenem 1g IM daily x 4 days.

Skilled nursing to obtain urine sample for UA PCR with culture and sensitivity once antibiotic therapy is completed and fax results to Lonestar Visiting Physicians. Continue on services with PAM Home Health. Continue current medication regimen. Lonestar Visiting Physicians to follow up as needed.

ALLERGIES
11417-Vancomycin
245-Penicillins
83-Cephalosporins

CURRENT MEDICATIONS

ertapenem 1 gram solution for injection mL , 1 DAILY reconstitute with 3.2 mL of 1% lidocaine , #4Rx Status : ACTIVE ,Effective Date : 02/27/2026

gabapentin 100 mg tablet tablet , 1 TID , #90Rx Status : ACTIVE ,Effective Date : 09/09/2025
levetiracetam 250 mg tablet tablet , 1 BID , #60Rx Status : ACTIVE ,Effective Date : 09/09/2025
megestrol 400 mg/10 mL (10 mL) oral suspension mL , 10 DAILY , #900Rx Status : ACTIVE ,Effective Date : 09/09/2025
melatonin 3 mg tablet tablet , 1 NIGHTLY , #30Rx Status : ACTIVE ,Effective Date : 09/09/2025
nitroglycerin 0.4 mg sublingual tablet tablet , 1 as directed every 5 minutes x 3 doses; if no relief call 911 , #25Rx Status : ACTIVE ,Effective Date : 09/09/2025
pantoprazole 40 mg tablet,delayed release tablet , 1 DAILY , #30Rx Status : ACTIVE ,Effective Date : 09/09/2025
polyethylene glycol 3350 17 gram/dose oral powder gm , 1 BID , #60Rx Status : ACTIVE ,Effective

Date : 09/09/2025
ondansetron 4 mg disintegrating tablet tablet , 1 BID , #60Rx Status : ACTIVE ,Effective Date : 06/26/2025

Review Of Systems

Constitutional Symptoms- Patient denies the symptoms of Fever, Weight gain, Weight loss, Fatigue, Chills, Appetite loss, Lethargy and Sweats
Eyes - Patient denies the symptoms of Eye disease, Eye injury
Genitourinary - blood in urine 2/25/26; positive UTI unable to treat at Encompass Rehab as patient had already discharged from facility.
Ears, Nose, Mouth and Throat - Patient denies the symptoms of Ear pain
Cardiovascular - Patient denies the symptoms of Chest pain
Respiratory - Patient with complaints of cough / congestion
Gastro Intestinal - Patient denies the symptoms of Abdominal pain

OBJECTIVE

Vitals

Respiratory Rate: 22. /min
Heart Rate: 76. /min
O2 % Blood CO-Oximetry: 99.
Blood Pressure Systolic: 112. mm[Hg]
Blood Pressure Diastolic: 72. mm[Hg]
Body Temperature: 96.2. F

Physical Examination

Eyes - Conjunctivae pink with no scleral jaundice, extra ocular movements are normal
Cardiovascular - no murmur heard on auscultation, S1 present, S2 present
Respiratory - breath sounds crackles to bilateral lungs
Gastrointestinal - non distended in all quadrants, non tender, audible bowel sounds, no palpable masses, soft.
Musculoskeletal - Pt with decreased mobility requiring increased assistance
Neurologic - PMHx of cognitive changes
Psychiatric - appropriate affect, appropriate mood, cooperative, patient is pleasant.
Genitourinary - blood in urine 2/25/26; positive UTI unable to treat at Encompass Rehab as patient had already discharged from facility.

ICD 10

ICD-10:

F41.1-Generalized anxiety disorder:
L20.9-Atopic dermatitis, unspecified: back
M79.671-Pain in right foot:
H57.89-Other specified disorders of eye and adnexa:
I21.A9-Other myocardial infarction type:
I50.9-Heart failure, unspecified:
I63.9-Cerebral infarction, unspecified:
J18.8-Other pneumonia, unspecified organism:
K21.9-Gastro-esophageal reflux disease without esophagitis:
L89.309-Pressure ulcer of unspecified buttock, unspecified stage:
M25.571-Pain in right ankle and joints of right foot:
N18.30-Chronic kidney disease, stage 3 unspecified:
N39.0-Urinary tract infection, site not specified: ertapenem IM to be completed by Pam Home Health

R09.89-Oth symptoms and signs involving the circ and resp systems: congestion to bilateral lower lobes
R41.89-Oth symptoms and signs w cognitive functions and awareness:

Plan/Orders
ASSESSMENT & PLAN

1. Urinary Tract Infection (UTI)
Current Medications: None currently.
Key Diagnostics / Monitoring: Urine sample needed for culture and sensitivity.
Quality & Preventive Measures: Ensure safe antibiotic selection given allergies.
Plan / Interventions:
-Positive UTI unable to treat at Encompass Rehab as patient had already discharged from facility.
- Start ertapenem IM 1g for 4 days, monitor for allergic reactions.
- Obtain urine sample post-treatment to assess infection resolution.
- Educate daughter on signs of allergic reactions and when to seek help.

2. Pneumonia
Current Medications: None currently.
Key Diagnostics / Monitoring: Not specified.
Quality & Preventive Measures: Pneumonia vaccine up to date
Plan / Interventions:
- Completion of pneumonia treatment prior to discharge.
- Monitor for respiratory symptoms.

3. Wound Care
Current Medications: None specified.
Key Diagnostics / Monitoring: Not specified.
Quality & Preventive Measures: Regular wound care and monitoring for infection.
Plan / Interventions:
- Continue wound care as per discharge instructions.
- Monitor for signs of infection.
- Educate on wound care at home.

PRIMARY CARE CLINICAL DECISION SUPPORT
- Invanz is selected as the antibiotic due to the patient's allergies, though it poses a 50/50 risk for reaction. Patient and daughter are informed of this risk.

ORDERS:
Skilled nursing to reconstitute ertapenem prior to injection add 3.2 mL of 1% lidocaine to the 1 g vial; shake the vial thoroughly until the powder is fully dissolved. Skilled nursing to administer ertapenem 1g IM daily x 4 days.

Skilled nursing to obtain urine sample for UA PCR with culture and sensitivity once antibiotic therapy is completed and fax results to Lonestar Visiting Physicians.

Continue on services with PAM Home Health.

Continue current medication regimen.

Lonestar Visiting Physicians to follow up as needed.
